

Appl. No. 10/527,859  
Preliminary Amdt. dated 12/13/06

REMARKS

Applicant respectfully requests preliminary amendments be made to the above entitled application. The proposed amendments to the specification supply an inadvertently omitted phrase, and clarify the description of the structure as clearly shown in Fig. 2a of the drawings.

The proposed amendment to independent claim 1 rearranges the previously claimed elements of the structure as between the known prior art in the preamble of the claim and the novel features in the characterizing part of the claim. By so doing, the invention is more clearly defined. The proposed amendments to dependent claims 4 and 5 remove indefinite language.

The requested changes do not add any new matter to the application.

Applicants believe no fees are due with the filing of this Amendment; however, if it is determined that a fee is required, please charge our Deposit Account No. 13-0235, maintained by Applicant's attorney.

Respectfully submitted,

By
